

Standard Incentives

Cascade Natural Gas Conservation Program

Commercial/Industrial

Saving energy is smart business. Investing in energy-saving natural gas upgrades can improve efficiency in your business and boost your bottom line. Cascade Natural Gas offers cash incentives on the following qualified natural gas upgrades:

Warm Air Furnaces < 225,000 kBtu/hr in—\$3.00/kBtu/hr High Efficiency Condensing Furnace—Min 91% AFUE	Clothes Washer—\$180 Commercial gas washer—1.8 MEF
HVAC Unit Heater—\$1.50/kBtu/hr High Efficiency Non-Condensing Min—86% AFUE	Attic Insulation—\$0.50/sq ft Attic insulation (retrofit only)—Tier 1: Min R-30
HVAC Unit Heater—\$3.00/kBtu/hr High Efficiency Non-Condensing Min—92% AFUE	Attic Insulation—\$0.65/sq ft Attic insulation (retrofit only)—Tier 2: Min R-45
Radiant Heating—\$6.50/kBtu/hr Direct-fired radiant heating	Roof Insulation—\$0.60/sq ft Roof insulation (retrofit only)—Tier 1: Min R-21
Boiler—\$4.00/kBtu/hr High Efficiency Condensing Boiler— Min 90% AFUE & 300 MBH in	Roof Insulation—\$0.80/sq ft Roof insulation (retrofit only)—Tier 2: Min R-30
Boiler Vent Damper—\$1,000 Min 1,000 MBH in	Wall Insulation ² —\$0.30/sq ft Wall insulation (retrofit only)—Tier 1: Min R-11
Boiler Steam Trap ¹ —\$80 Min 300 kBtu in; steam pressure at 7psig or >	Wall Insulation ² —\$0.40/sq ft Wall insulation (retrofit only)—Tier 2: Min R-19
Domestic Tankless Instantaneous Water Heaters—\$30/gal/min With standing pilot—Min .708 EF	ENERGY STAR Gas Fryer—\$600 ENERGY STAR
Domestic Tankless Instantaneous Water Heaters—\$40/gal/min With electronic ignition—Min .738 EF	Gas Convection Oven—\$600 Full sized oven (Cooking capacity six (6) cubic ft or more)
Domestic Hot Water Tanks—\$2.50/kBtu/hr Condensing tank— Min 91% AFUE/91% Thermal Efficiency	Gas Griddle—\$500 High efficiency infrared gas griddle

Please note: Standard incentives are available on the qualified measures above to Cascade Natural Gas customers on rate schedules 504, 505, 511, 570 and 577.

¹ This measure will only be allowed where the customer agrees to regular trap maintenance and replacement every seven (7) years.

² Minimum value of R-11 applies only where existing walls have no internal insulation cavities.

Program Guidelines

Requirements (as applicable to the project):

- Participating customers must be a new or existing commercial or industrial natural gas customer of Cascade Natural Gas Corporation on one of five qualifying rate schedules: 504, 505, 511, 570 or 577.
- Incentives apply on qualified high efficiency space and water heating systems, and cooking equipment installed as replacement, retrofit or new installation in place of standard efficiency equipment. If the equipment installation, replacement, or retrofit provides significant increase over existing high efficiency equipment, please contact program representative for potential custom incentive.
- Insulation measures must be installed in an existing building heated by natural gas without functional insulation in the component being treated.
- Eligible measures installed are subject to the rebates coinciding with the date of the installation as outlined in our tariff.
- Customers requesting rebates for site-specific energy efficiency measures must submit estimated costs and natural gas savings associated with the project. Natural gas savings are to be calculated using standard engineering practices. The Company will review the natural gas savings calculations, and reserves the right to modify energy savings estimates.

To receive a cash conservation incentive, please provide the following documentation:

- Incentive request form
- W9 form
- Copy of recent CNG gas bill
- Quote for proposed equipment
- Final invoice marked "paid"
- Manufacturer's spec sheet

Get Started Today!

To apply for an incentive, download a Standard Incentive Request form at www.cngc.com/conservation and return to us via email at conserve@cngc.com or by fax at 1.866.610.9555.
