

SAVINGS TRIPLE-PLAY WITH AN ENERGY STAR® WASHER

Front-loading clothes washers with the ENERGY STAR certification save energy, water and money so you can clean up while you wash. You could save up to 3,000 gallons of water each year and use up to 25 percent less energy with a high-efficiency front loader.

Cascade Natural Gas customers are eligible for up to \$65 in cash incentives from Energy Trust of Oregon when you purchase a qualifying high-efficiency clothes washer.

In the Community to Serve®

SAVE ON ENERGY COSTS WITH EVERY LOAD YOU WASH

High-efficiency ENERGY STAR washers are available in many different sizes and colors, which makes finding a model that works for you easy. When shopping and comparing, pay attention to additional energy-saving features like a suds saver setting that can reduce how much detergent is used; faster spin speeds that reduce energy use and dry time; and pre-soak options that make removing stains a breeze.

Find a list of qualifying models and apply for your incentive at www.energytrust.org/appliances or call 1-866-368-7878.

Incentives are subject to qualification; funding availability may change.

MORE WAYS TO SAVE

Not ready for an appliance upgrade or already have a new washer? You can still save water and energy with these low- and no-cost tips:

- **Install** water-saving showerheads and faucet aerators.
- **Wash** and rinse laundry with cold water. To save even more, run full loads and consider hanging your clothes to air dry.
- **Use** the water-saver and energy-saver options on your dishwasher and run it only when full.
