

SIMPLE SWITCH, SUPERB SAVINGS

Did you know your daily shower is one of the biggest water wasters in your home? Switching to an efficient showerhead is a simple and easy way to reduce water usage. Best of all, you won't have to sacrifice great water pressure.

Cascade Natural Gas customers can receive instant discounts from Energy Trust of Oregon on qualifying showerheads at local retailers.

In the Community to Serve®

WASH, RINSE, SAVE

The average home could save 2,300 gallons of water a year—and reduce water heating costs—just by switching to new, efficient showerheads. Replacing a single standard showerhead with a WaterSense® certified showerhead can save \$55 a year in energy and water costs. Look for the Energy Trust logo in stores to receive instant discounts on qualifying purchases, no coupon necessary.

To find participating retailers and qualifying models, visit www.energytrust.org/showerheads.

SHORTEN YOUR SHOWER TIME

Looking to step up your efficiency game? Try this quick tip to cut hot water costs:

- Use a timer to help track and reduce your shower time. You'll reduce water consumption and save on hot water costs.
