ENERGY-SAVING TIPS ON A BUDGET

Follow these simple tips to save energy and money this season, and all year-long:

- Install a smart thermostat so it can adjust the temperature automatically and help you save energy.
- Turn down the thermostat to 65-68 degrees during the day and 58-60 degrees at night during cooler months.
- Clean or replace filters regularly to help your furnace work at peak efficiency.
- Add weather stripping to drafty doors and windows.
