

REDUCE WATER HEATING COSTS

Water heating solutions for
commercial and industrial customers

Your business can reduce water heating costs by upgrading to high-efficiency water heating systems. CNG offers rebates to help reduce your upfront costs and make improvements more affordable.

COMMERCIAL WATER HEATING REBATES

The following energy-efficient technologies can reduce water heating costs while providing consistent hot water:

- › Domestic Hot Water (DHW) tankless water – up to \$150/gpm
- › DHW recirculation controls - \$200
- › DHW hot water tanks - \$2.50/kBtu/hr

Energy Saver Kits

Eligible businesses can receive free water-saving devices including low flow showerheads, bath aerators and a kitchen pre-rinse spray valve. Energy-efficient aerators and showerheads use less water compared to standard fixtures without impacting water pressure.
