

RADIANT HEATING

Heating solutions for commercial and industrial customers

Cascade Natural Gas (CNGC) offers rebates for qualifying energy-efficient radiant heating equipment and can help offset project costs:

\$15.00/kBtu/hr for direct fired radiant heating

Ex: 180 kBtuh x \$15.00/kBtuh = \$2,700

Real Project, Real Savings

Amro Nurseries in Shelton, WA knew it would be important to save on heating costs when looking to expand their business.

- Two 150,000 Btu heaters
- 1,299 annual therms saved
- \$2,092 CNGC rebate

RADIANT HEATING BENEFITS:

- › Increased comfort: provides warmth at lower temperatures
- › Reduced costs: less energy is used
- › Quiet operation: no noisy fans or blowers
- › Take up less space: more flexibility with business floorplan

“Radiant heat is the way to go...The whole building is now the same temperature consistently. When the hangar doors are opened, then closed in winter, the building warms back to a comfortable temperature quickly – plus they are very quiet!”

John Lewis,
Facilities Manager
Mission Aviation Training Academy
