

# MAKE A SPLASH WITH WATER SAVINGS

Water efficiency is the smart use of our water resources through water-saving technologies and simple steps we can all take around the house. Using water efficiently now can help save energy and ensure reliable water supplies for future generations.

This month Cascade Natural Gas and Energy Trust of Oregon bring you water saving tips for the hot summer months when water use can increase by as much as 40%.

*In the Community to Serve®*

# SAVE WATER TO SAVE ENERGY

When you save water, you also save energy. Follow these tips this summer for water savings:

- Keep a pitcher of drinking water in the refrigerator instead of letting the faucet run until the water is cool.
- Thaw food in the refrigerator overnight rather than using a running tap of hot water.
- Sweep driveways, sidewalks, and steps rather than hosing off.
- Cut back on watering your grass during the hottest summer months.
- Wash dishes on water saving mode in the dishwasher, or plug the sink and fill with water for washing by hand.
