

# COMFORT YOU CAN COUNT ON

We often think about sealing drafts and leaks before the winter season, but a tightly sealed home is important year-round. By installing high-efficiency windows and updating your home's insulation you can decrease drafts and air leaks, improve indoor air quality, and create a healthier, more comfortable home.

As a Cascade Natural Gas customer, you can receive Energy Trust of Oregon cash incentives of up to \$6.00 per square foot on qualifying window upgrades and up to \$0.50 per square foot for energy-efficient insulation.

*In the Community to Serve®*

# IMPROVE VALUE, COMFORT AND EFFICIENCY FOR YEARS TO COME

Updating your insulation and replacing windows can help you and your family:

- Enjoy year-round comfort
- Lower energy bills
- Control moisture and keep pollutants out
- Increase home value and curb appeal

**Learn about available cash incentives at [www.energytrust.org/residential/incentives](http://www.energytrust.org/residential/incentives).**

*\*Incentives are subject to qualification, funding availability and may change.*

## INSTALLATION TIP: SEAL AIR LEAKS

Whether you're installing yourself or working with a professional, sealing air leaks before upgrading to energy-efficient insulation can help maximize the performance of your new insulation. Sealing leaks before installation can also increase your comfort and energy savings even more.
