

MAINTAIN COMFORTABLE TEMPERATURES YEAR-ROUND

Insulation makes all the difference. By insulating your home you can reduce monthly energy bills, maintain comfortable indoor temperatures and reduce outside noise. As a customer of Cascade Natural Gas, you can get cash back when you insulate your home thanks to incentives from Energy Trust of Oregon.

In the Community to Serve®

DID YOU KNOW?

- Insulation is one of the most cost-effective ways to prepare your home for any weather and season.
- Homes built before 1978 typically have about 75% less insulation than homes built to today's standards.
- Because warmer air naturally rises, your attic is the most important area to properly insulate, but wall and floor insulation also make a difference in the comfort of your home and save energy.
- Working with Energy Trust could save you up to \$1.50 per square foot of insulation installed.

Visit www.energytrust.org/insulation or call 1-866-368-7878 to learn more about these incentives.

**Incentives are subject to funding availability and may change.*
