## New Home Incentives

In the Community to Serve®

04/22

Rebates effective for installs on or after April 1<sup>st</sup>, 2022 through December 31<sup>st</sup>, 2023.  
 Incentives may be subject to change and are only applicable for measures approved with-  
 in the Biennial Conservation Plan at the time of installation.  
 Check [www.cngc.com/energy-efficiency](http://www.cngc.com/energy-efficiency) for the most up-to-date information.

New Home Measures	Basic Specifications	Incentive
Furnace <sup>1</sup>	98% AFUE minimum or higher 95% AFUE minimum or higher	\$900 \$650
Hearth (Fireplace) <sup>2</sup>	70% EnerGuide FE (Fireplace Efficiency)	\$300
Condensing Boiler <sup>1</sup> (space heating only)	95% AFUE minimum or higher	\$900
Combination Radiant Heat System <sup>1 &amp; 3</sup>	95% AFUE minimum or higher	\$1,500
Condensing Tankless Water Heater <sup>3</sup>	0.91 UEF minimum or higher	\$350
ENERGY STAR® Clothes Washer <sup>3</sup>	Model must be chosen from the ENERGY STAR certified Clothes Washer list: <a href="https://www.energystar.gov/products/clothes_washers">https://www.energystar.gov/products/clothes_washers</a>	\$50
Exterior Entry (not sliding) Door <sup>1</sup>	U-Factor must be less than or equal to 0.21 National Fenestration Rating Council (NFRC) sticker required	\$100
ENERGY STAR Smart Thermostat <sup>1</sup>	Model must be chosen from the ENERGY STAR certified Smart Thermostat list: <a href="https://www.energystar.gov/products/smart_thermostats">https://www.energystar.gov/products/smart_thermostats</a> Must be connected to home WiFi	\$75

New Home Programs	Basic Specifications	Incentive
ENERGY STAR Certified Home <sup>1 &amp; 4</sup>	National Program Requirements Version 3.2 (Rev. 09) ENERGY STAR Certification Required	\$600
Built Green Certified Home <sup>1 &amp; 4</sup>	Requires Built Green 3 Star Certification or greater and 95% AFUE furnace or boiler	\$600
New Home Bundle C <sup>5</sup>	Requires natural gas Fireplace or ENERGY STAR Smart Thermostat. Also two unique New Home measures, or a qualifying Home Certificate.	\$250

## Measure Caveats

- Home must be heated by natural gas and a Variable Refrigerant Flow (VRF) or multi-zone ductless electric heat pump cannot be present.
- Must use intermittent ignition device. Specifically, per CSA P.4-15 Testing Standard referenced to downloadable Natural Resources Canada EnerGuide database of December 3, 2018 and later. Eligibility for older models not referenced in the December 2018 or later downloadable database, based per CSA P.4 Testing Standard referenced to downloadable Natural Resources Canada EnerGuide database of February 14, 2017. Ventless fireplaces are not eligible. EnerGuide database: [https://www.nrc.ca/eng/energy\\_efficiency/index.cfm?action=app\\_search\\_results&appliances=FPREPLACE\\_C](https://www.nrc.ca/eng/energy_efficiency/index.cfm?action=app_search_results&appliances=FPREPLACE_C)
- Water-heating fuel must be provided by CNGC for all water-heating incentives. Use of tankless water heater is acceptable for combined space and water heating with a Uniform Energy Factor (UEF) of 0.95 or higher. Combined use of indirect, non-fired tank is acceptable for use with approved 95% AFUE Boiler where required.
- New Home only rebates may not be combined with any other measure except Hearths (Fireplaces). Built Green measures require proof of a natural gas heating system, such as a photo or invoice.
- Bundles are subject to change in consultation with the Cascade Conservation Advisory Group (CAG).

## New & Existing Homes Incentives

### Eligibility Requirements

- Applications must be received within 180 days of install date.
- Applicant must be a Washington State CNGC customer on residential rate schedule 503 (see bill).
- Homes must be heated by natural gas to be eligible for space heating and weatherization rebates.
- Homes using a VRF or multizone ductless electric heat pump are ineligible for space heating rebates.
- Measures must be installed by a Washington State licensed contractor in good standing, except doors and thermostats.
- Appliances and materials specified by Washington state code are not eligible for CNGC incentives.
- ENERGY STAR homes must be approved by an ENERGY STAR verifier and must present the certificate.
- Built Green Homes must present a 3 star or higher Built Green Certification with a 95% AFUE natural gas furnace or boiler.
- Review all terms and conditions for the program at [www.cngc.com/energy-efficiency](http://www.cngc.com/energy-efficiency)

### How to Qualify for Incentives

- Establish your eligibility by visiting [www.cngc.com/energy-efficiency](http://www.cngc.com/energy-efficiency) or calling 866.626.4479
- Submit your application. Obtain the application or apply online at [www.cngc.com/energy-efficiency](http://www.cngc.com/energy-efficiency). Fillout the application completely, sign, and send with a copy of your invoice to:

**Mail: CNGC Energy Efficiency Rebate Processing  
1600 Iowa Street, Bellingham, WA 98229**

**Fax: 360.788.2396**

- Multiple Applications to Submit? We can simplify the application process for multiple premises with our Builder Application. For more information, contact our Builder Program Coordinator at 866.626.4479

Upon receipt of completed applications, please allow up to 12 weeks for processing.

**For questions or more information visit us online at:  
[www.cngc.com/energy-efficiency](http://www.cngc.com/energy-efficiency) or call 866.626.4479.**
