

# Conservation Incentive Program September 2010 Trade Ally Newsletter

## The Cascade Natural Gas Conservation Incentive Program has a new address!

Cascade Natural Gas,  
c/o Lockheed Martin Energy and Environmental Services  
22121 20th Avenue SE  
Bothell, WA 98011

Effective immediately, all conservation rebate applications should be sent to this address. Please be sure to inform any of your customers currently applying for CIP rebates of this change. Rebate forms containing our updated information can be found at:

<http://www.cngc.com/conservation>

To learn more, please visit us online at [www.cngc.com/conservation](http://www.cngc.com/conservation) or call us at 1.866.626.4479.

Cascade Natural Gas helps Washington customers save money and energy with cash incentives for the installation of qualified energy-efficient equipment. Start saving today!

## Easy access to our trade ally website

In order to make our program transition as easy as possible, we have temporarily removed the username and password from our trade ally website:

[http://www.cngc.com/conservation/conservation\\_trade\\_allies\\_login.asp](http://www.cngc.com/conservation/conservation_trade_allies_login.asp)

This site will be your information center for program updates and will contain all revised contacts, forms, and program information. The cooperative marketing page will still remain password protected.

If you have any questions, please contact: [conserve@cngc.com](mailto:conserve@cngc.com).

*In the Community to Serve®*

## Meet Autumn Marks

Autumn is the newest member of the Cascade Natural Gas (CNG) Conservation Program team. She covers the Foodservice and Hotel/Lodging sector, assisting businesses in taking advantage of CNG's incentives for energy efficient equipment and insulation.

Autumn's background is in the hospitality industry, where she has been fortunate to work in a wide variety of positions—from recruiting high school students for a premier culinary school to assisting business members of the Washington Restaurant Association. The position at the WRA led her to the energy conservation field and her work with the Cascade Natural Gas Conservation Program.

Because energy waste is so prevalent in the Foodservice and Hotel/Lodging industry, restaurateurs and hoteliers can benefit from finding ways to upgrade to more efficient pieces of foodservice equipment, space and water heating systems, and improved insulation. Cascade Natural Gas is dedicated to the conservation of energy and can help businesses implement conservation measures by offering energy conservation incentives to its Washington customers. Autumn looks forward to working with you, our valued Trade Allies, and our shared customers to take advantage of the opportunities CNG provides to save energy and dollars.
